

Three IIT Kharagpur Students to join infofree.com as interns in Summer 2017

Three current IIT Kharagpur students will be joining the infofree.com team this upcoming summer for a once in a lifetime internship.

The three students, their course of study, and some of their areas of interest are as follows:

Sayan Mandal is currently a 3rd year undergraduate student studying to obtain a Dual Degree (B.Tech and M. Tech) in Computer Science and Engineering. Sayan is interested in machine learning and all of its related fields.

Jayesh R is studying within the Vinod Gupta School of Management (VGSOM). Jayesh is hoping to gain industrial experience and increase management skills both within his degree program and while holding this role as an intern.

Naman is also studying within VGSOM and wants to learn more about business development and the client side of this process. Prior to this he has worked in a number of different roles that have allowed him to gain a better understanding of marketing.

These three students will have the opportunity to learn about the business process and work closely with those at infofree.com. Infofree.com was founded by Mr. Vinod Gupta who is also an IIT Kharagpur graduate. Mr. Gupta has given back to IIT Kharagpur in countless ways and truly transformed education at IIT Kharagpur by founding the Vinod Gupta School of Management (VGSOM), which has become a Tier-1 business school in India. He also gives back to many other initiatives being pioneered at IITKGP (e.g., infrastructure growth, scholarships, etc.) and created this internship program to help IIT Kharagpur students to use their current skills and facilitate professional development. The three interns this coming summer will have an experience of working within the innovative environment of InfoFree in addition to gaining knowledge for their future!

Congratulations to Jayesh, Naman, and Sayan!
